DETAILED ACTION

Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

As set forth in MPEP § 1895.01, restriction practice in national stage applications filed under 35 U.S.C. 371 is determined under unity of invention principles as set forth in 37 CFR 1.475 and 1.499. This application includes numerous embodiments, many of which are separately claimed. Accordingly, this application is subject to a lack of unity of invention requirement. The groups of claims have been listed below along with their *special technical features*:

Group I, claim(s) 1-19 and 32-36, drawn to a value document.

Group II, claim(s) 1, 20-24, and 37, drawn to a method of producing a value document.

Group III, claim(s) 1, 25-31, drawn to a method of checking or processing a value document.

Although claim 1 is generic to all of the above groups, it is not considered patentable over the patent to Weitzen et al. (US 4,455,039). Weitzen et al. disclose a value document with a first feature substance 8 incorporated into the volume of the

Art Unit: 3725

substrate 2 and a second feature substance 6 encoded on the surface of the document (Fig. 2). The patentability of the application is thus based upon the *special technical features* of the dependent claims. In such a case, a lack of unity requirement is proper.

Applicant is advised that the response to this requirement to be complete must include an election of one the above groups even if the requirement is traversed.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

The examiner has required restriction between product and process claims. Where applicant elects claims directed to the product, and the product claims are subsequently found allowable, withdrawn process claims that depend from or otherwise

Art Unit: 3725

require all the limitations of the allowable product claim will be considered for rejoinder.

All claims directed to a nonelected process invention must require all the limitations of an allowable product claim for that process invention to be rejoined.

In the event of rejoinder, the requirement for restriction between the product claims and the rejoined process claims will be withdrawn, and the rejoined process claims will be fully examined for patentability in accordance with 37 CFR 1.104. Thus, to be allowable, the rejoined claims must meet all criteria for patentability including the requirements of 35 U.S.C. 101, 102, 103 and 112. Until all claims to the elected product are found allowable, an otherwise proper restriction requirement between product claims and process claims may be maintained. Withdrawn process claims that are not commensurate in scope with an allowable product claim will not be rejoined. See MPEP § 821.04(b). Additionally, in order to retain the right to rejoinder in accordance with the above policy, applicant is advised that the process claims should be amended during prosecution to require the limitations of the product claims. **Failure to do so may result in a loss of the right to rejoinder.** Further, note that the prohibition against double patenting rejections of 35 U.S.C. 121 does not apply where the restriction requirement is withdrawn by the examiner before the patent issues. See MPEP § 804.01.
